

## HINDLIP, MARTIN HUSSINGTREE & SALWARPE PARISH COUNCIL

### COMMUNITY ENHANCEMENT SCHEME

After extensive community consultations, the Parish Council has agreed to proceed with a biodiversity enhancement scheme at Martin Hussingtree.

The planting of species of native trees and bushes, as recommended by the Worcestershire Wildlife Trust, will be carried out in the autumn of 2020 on the Village Green (middle and side copse).

The aim of the scheme is to encourage wildlife and species biodiversity in an aesthetically pleasing setting complimented by the enhancement of carbon sequestration thus contributing to the overall climate change strategy.

Residents with any views on the proposed scheme, please contact the Parish Clerk.
