

Improved Mobile Phone Connectivity in Birtsmorton and part of Castlemorton

YOUR FEEDBACK IS REQUIRED

Mobile network providers are planning to completely switch off 3G mobile phone signals, transitioning entirely to faster 4G and 5G networks. This shutdown will create coverage gaps that require new mobile masts in order to provide adequate mobile voice and data services.

Worcestershire County Council is working to enhance rural connectivity, with Telecommunication Provider Atlas exploring a potential mast site in Birtsmorton Parish. The proposed location is situated southeast of the Farmers Arms, on open farmland near an existing power source.

This specific site has been identified as the optimal location for improving mobile signal strength for residents in Birtsmorton and the surrounding Castlemorton area near the local school.

To facilitate a potential planning application, Atlas is currently seeking local feedback and community input before preparing formal documentation.
